

FAIR Stations “Future Secure and Accessible Rail Stations”

Invitation to

Final Conference, Brussels, 11th December 2019

**Venue: NH Collection Brussels Centre
Boulevard Adolphe Max, 7
1000 Brussels (Belgium)
Meeting Room: Brugges**

Dear Sir / Madam,

I would like to cordially invite you to the FAIR Stations project Final Conference to be held in Brussels, Belgium, on Wednesday 11th December 2019.

FAIR Stations is a project funded by the Shift2Rail Joint Undertaking initiative, started in September 2017, contributing to the “Innovation Programme 1: Cost-efficient and reliable trains, including high-capacity trains and high-speed trains” and the “Innovation Programme 3: Cost-Efficient and Reliable High-Capacity Infrastructure”. The project involves 8 partners from 5 European countries: Stam (IT), NewRail (UK), Metro de Madrid (ES), TU Wien (AT), SIIT (IT), APF (ES), Ilunion (ES), UITP (BE).

The main objective of the project is to develop an integrated approach towards safety and accessibility in the design and development of railway stations, with the aim of obtaining the best balance between the needs of passengers and the infrastructural constraints, with a particular focus on persons with reduced mobility.

For further information on the project, please visit our website: www.fairstations.eu

During the event the project partners will present the major results achieved by the project, which will be followed by a virtual demonstration of the proof-of-concepts. See the attached draft agenda for details.

I would like to invite you to attend the event and participate in the discussions which will benefit from your knowledge and expertise. I kindly ask you to confirm your interest in participating by registering on <https://efficy.uitp.org/onlinereg/?e=6359&ext=1&p=-1&rk=online> by 4th December 2019.

For additional information on the event: u.battista@stamtech.com (FAIR Stations Coordinator)
corentin.wauters@uitp.org (UITP)

Looking forward to seeing you soon in Brussels

Best regards

Umberto Battista

Project Coordinator, Stam S.r.l.

This project has received funding from the European Union’s Horizon 2020 research and innovation programme under grant agreement No 777636.
